

THE NISSAN Z®

Rewriting the rules of sports cars since 1969

240Z (1970–1973), **260Z** (1974), **280Z** (1975–1978)

The tradition begins. Check out the yellow 240Z originally owned by Yutaka “Mr. K” Katayama — the father of Nissan Z.

280ZX (1979–1983)

A more luxurious interior and available T-top roof make the Nissan Z a capable grand tourer.

300ZX® (1984–1989)

All-new, with a V6 engine under the hood for the first time.

300zx (1990–1996)

Wide, low, and distinctive, with an available twinturbocharged engine — another first for the Nissan Z.

350Z (2003–2009)

The Nissan Z returns after a six-year hiatus. Its sleek design carries many 240Z styling cues.

370Z (2009–2020)

The most powerful Nissan Z ever, topped off by the awe-inducing 350-horsepower 370Z NISMO.®

BECAUSE FIRST IMPRESSIONS ARE EVERYTHING

The pulse-raising Nissan Z offers exclusivity, excitement, and exhilarating performance. A numbered badge helps mark its place in history, and with very limited quantities being built...seeing one will be rare. And seeing one stopped — well, this is a sports car that loves to be driven.

Exclusive bronze-finish forged wheels and yellow brake calipers

Unique 19" bronze-finish RAYS® forged alloy wheels and yellow brake calipers create a stunning presence and promise thrilling performance.

Two-tone yellow and black exterior

Using a special painting process, the Ikazuchi Yellow TriCoat creates the perfect neutral yellow you see here.

400-horsepower, twin-turbo V6 engine

At the heart of the Nissan Z® is this 3.0-litre V6 twin-turbocharged 24-valve engine. An aluminum-alloy block and heads keep things light, while a water-cooled intercooler helps keep things cool. Tech brings power with 350 lb.-ft. of torque starting at under 1,600 rpm.

6-Speed Manual and 9-Speed Automatic Transmissions

An upgraded 6-speed manual transmission with available SyncchroRev Match® means pure driving thrills. An available 9-speed automatic with shift-by-wire controls brings cutting-edge technology and response.

A chassis built to respond

The all-new Nissan Z is designed to handle your favourite roads with new monotube shocks and suspension tuning for enhanced response. Strong and lightweight aluminum and carbon-fibre composite components, plus massive 19" RAYS® super-lightweight forged wheels with new performance tires, will put a G-induced smile in every turn.

9-Speed Automatic Transmission

Launch control and mechanical limited-slip differential

The first on any Nissan Z — launch control helps reduce wheel spin and hop, by holding the engine at a preset rpm and modulating power as you pull away to give you the fastest, most-consistent acceleration every time. Combined with Nissan Z's mechanical limited-slip differential, it lets you enjoy every last rpm that powerhouse serves up.
